

```
public class WorkerEmployee extends Employee {  
    double monpay;  
  
    public WorkerEmployee(String id, int salary) {  
        super(id, salary);  
        // TODO Auto-generated constructor stub  
    }  
  
    @Override  
    public int getPay() {  
        int pay = (int)(getSalary() /12);  
        pay = pay - 100;  
        return pay;  
    }  
}
```
