

```
public class ManagerEmployee extends Employee {  
    double monthlyPay;  
  
    public ManagerEmployee(String id, double salary) {  
        super(id, salary);  
        // TODO Auto-generated constructor stub  
    }  
  
    @Override  
    public int getPay() {  
        int pay = (int)((getSalary())/12);  
        pay= (int) ((pay *.2) + pay);  
        return pay;  
    }  
}
```
